## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in–
  - (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
  - (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claim 8 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6,021,564

(hereafter Hanson).

Hanson discloses, referring to figure 1, a printed circuit board (1) comprising; an insulative substrate (7) an upper surface pattern (9) and a lower surface pattern (5) provided, repectively on an upper and lower surface of the insulative substrate; and a blind via hole (11) for electrically connecting the upper surface pattern and the lower surface pattern, wherein an upper portion of the blind via hole is opened and a bottom of the blind via hole is covered by the lower surface pattern, the thickness of the upper surface pattern (5 micrometers, see col. 10, lines 25-30) being less than that of the lower surface pattern (19 micrometers, see col. 10, lines 1-10).

### ***Response to Arguments***

Applicant's arguments with respect to claim 8 have been considered but are moot in view of the new ground(s) of rejection.
